

ABSTRACT

In an information recording/reproduction apparatus (Arp),
a preprogrammed recording specifying unit (1, As) specifies a date
5 of distribution, a time of distribution, and a distribution source
of information as well as an information recording unit (BD); a
preprogrammed recording setting displaying unit (8) displays a
preprogrammed recording setting (As) on a two dimensional matrix
(7); a preprogrammed recording setting specifying unit (20)
10 specifies each (8) preprogrammed recording setting (As) displayed
on the two dimensional matrix; a preprogrammed recording setting
displaying unit (30) displays the specified preprogrammed
recording setting (As); and the preprogrammed recording setting
editing unit (30) edits the preprogrammed recording setting (As).
